

Report

A report is a comprehensive document that provides a detailed and structured account of data analysis, findings, and insights. It is typically used for in-depth analysis, documentation, and communication of results. Reports are suitable for a diverse audience, including decision-makers, analysts, and stakeholders who need a comprehensive understanding of the data.

Designing a report in Power BI involves connecting to data sources, creating visualizations like charts and graphs, customizing their appearance and interactivity, organizing them logically on the canvas, formatting elements for consistency and clarity, and optionally creating dashboards for a summarized view. Throughout the process, it's essential to consider the audience's needs and ensure the report effectively communicates insights from the data. Finally, iterate based on feedback to continually improve the report's design and usefulness.

Observations drawn from reports in Power BI can provide valuable insights into malnutrition trends:

Dashboard Insights Report

1. Sales & Profit Overview

- The dashboard shows a total sales amount of \$141.49M with an overall cost of \$60.39M and a strong profit margin of 57.3%.
- High profitability indicates efficient operations, strong product demand, and effective revenue generation across business activities.

2. Shipment Distribution Analysis

- Shipment distribution is concentrated in the lower-to-medium shipment range, with shipment counts gradually decreasing for larger shipment volumes.
- This analysis helps understand delivery patterns, optimize logistics operations, and improve shipment planning efficiency.

3. Product Performance Analysis

- Products such as Organic Choco Syrup, Caramel Stuffed Bars, and Manuka Honey Choco generated the highest profit percentages.
- A few products, including 85% Dark Bars and Baker's Choco Chips, recorded negative profit margins, highlighting areas requiring pricing or cost optimization.

4. Geographic Sales Contribution

- India contributed the highest sales share, followed by New Zealand and Australia, showing strong market performance in these regions.
- Geographic analysis helps identify high-performing markets and supports strategic regional expansion decisions.

5. Salesperson Performance

- Top salespersons maintained profit margins above 56%, with Ponnan achieving the highest total sales performance.
- This comparison helps evaluate employee productivity, recognize top performers, and improve sales strategies across teams.
